	Veggie spray
	Tap with light

FOOD PREPARATION CENTRE
Franke sinks are Food Preparation Centres. The benchtop space is maximised by utilising accessories such as chopping boards, strainer trays, strainer bowls and rollamats.

18/10 STAINLESS STEEL
18/10 means that there is 18% chromium and 10% nickel. This stainless steel is 304 grade which is commonly referred to as surgical grade and is used for maximum durability.

FRAGRANITE
Fragranite sinks are made from 80% quartz and 20% methylmethacrylate (resin). The quartz sand, which is fired at high temperature, is colour-pigmented.

PUSH BUTTON REMOTE WASTE
Lift the plug in your Franke sink without putting your hands in the water by pushing the elegant stainless steel button.

FAST FIX INSTALLATION
The stainless steel clips are welded to the side of the bowl and rail. The installer only needs to put silicone on the cut-out edge and push the sink into the cut-out.

HIDDEN OVERFLOW
Designed to ensure that the sink never overflows. Franke looks for kitchen solutions with practicality, the best hygienic levels and the best cosmetic look.

FRANKE ROUND OVERFLOW
The round overflow is designed to ensure that the sink never overflows.Franke looks for kitchen solutions with practicality, the best hygienic levels and best cosmetic look.

SOUND DEADENING PADS
Sound deadening pads are installed to reduce noise levels when pouring or running water into the sink.

HYGIENIC INTEGRATED WASTE
Features elegant design, reduced bacteria build-up on curved edges and easy waste fitting installation. (Food waste disposer cannot be fitted to hygienic waste outlet).

INTEGRATED SEALING STRIP
Franke sinks with integrated sealing strip ensure sinks are water sealed with a factory-applied, inert polyurethane sealant on the underside of the rim edge.

FLEXIBLE FIXING SYSTEM
All laser-cut edge profile sinks have a rail system on the underside of the sink to slide clips into the correct location that the installer needs them to ensure a secure fit.

LASER EDGE PROFILE
The laser-edge profile is a slim profile for topmount sinks at the benchtop, providing easy cleaning and a flushmount appearance.

BOX CENTRE

THE ULTIMATE KITCHEN WORKSPACE

A workspace that combines a washing area and a space dedicated to food preparation, the Box Centre is the perfect solution for those who truly value seamless work processes in the kitchen. When you're not cooking, everything is stored away safely, hygienically and out of sight.

MAKE IT WONDERFUL WITH FRANKE KITCHENS

It's easy to be ordinary; to have an ordinary home, filled with things you neither love nor hate.
But you should never settle for ordinary and that's why we ensure everything we make is wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way; from the first glimpse of carefully considered design, to manufacturing standards that ensures you can feel the quality and craftsmanship of every piece.

Be inspired. We are constantly thinking of new ways to make our range even better, adding new products, new ideas and new innovations.
Keep up to date with it all on our Facebook and Instagram pages.

CONTENTS

CONTENTS

1911

Hermann Franke establishes a sheet metal business in Rorschach, Switzerland.

1914 ▸24

During the First World War it is difficult to obtain materials for production. The post-war period and economic crisis delay development of the business.

1925 ▸30

Recovery of industrial and construction sectors. Addition of a sanitary installations department. Manufacture of hobs, skylights and dormer windows.

1931 ▸34

General slump. First sinks produced in nickeline, monel metal and later stainless steel.

1935 ▸36

Construction of a new factory, offices and residential building in Aarburg. 10 employees.

1937 ▸38

Economic upswing boosts sales. Beginning of series production and launch of first fully welded, flushmounted sink.

1946 ▸49

Expansion of manufacturing facilities and production of complete kitchens (Movenpick). First exports to neighbouring countries. Workforce increases to 250.

HUMBLE BEGINNINGS

Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship.

Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION ENGINEERING

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart design and stunning beauty.

A CENTURY WITHOUT COMPROMISE

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

1962 ▸ 74

Marked expansion of the Franke group. 13 new subsidiaries and two license companies established in Europe. In 1972, Franke builds and installs the first kitchen for McDonald's in Munich.

1975 ▸ 88

Walter Franke's friend and business partner Willi Pieper takes over ownership of Franke. Franke is structured into divisions in 1988.

1989

Michael Pieper (Willi Pieper's son) becomes CEO, and owner of the Franke Group in 1990. Under his leadership, rapid and systematic expansion of the core businesses worldwide takes place.

2002

Franke repositions its strategy and structure. The divisions are given more autonomy and responsibility. Two further core businesses are identified and organised to secure and build on the success of Franke:

Franke Water Systems and Franke Coffee Systems

FRANKE TODAY

Many things have changed for Franke as a business over the last century. What has never changed in 100 years is the unwavering belief in product quality.

Although the product itself transformed from a single household article to a lifestyle addition in a unique range of kitchen systems, the outstanding quality has been a constant.

DISCOVER THE WONDERS OF A FRANKE KITCHEN

What does your dream kitchen look like? Does it stand out with chrome-plated steel? Or is it more reserved with a fine, stone finish? Will you be cooking for one, two or twenty?

We at Franke believe that every kitchen should be as unique as you are. It should be a place where you feel free to cook, eat, entertain, celebrate and more. And that's why we want to make your kitchen perfect – from sink to tap to oven – and from morning until night, each and every day.

WONDERFULLY CLEVER

Imagine a kitchen where everything worked together, looked great and had a purpose. A kitchen where all its components were designed to help you enjoy your day more. At Franke, this is how we approach the design of our kitchen systems. We work hard to ensure our solutions deliver the perfect balance of style, comfort and functionality to your kitchen.

WONDERFULLY VERSATILE

Are you a minimalist? Or someone who prefers bolder colours and shapes? With Franke, it doesn't have to be one or the other. Having a wide range of textures, colours and materials for you to choose from allows you to customise the kitchen you want and one that complements your sense of style.

WONDERFULLY INNOVATIVE

For over 100 years we've been tirelessly improving and innovating our products and services. This history and experience has helped us design and create kitchen solutions and products that prove themselves day-in and day-out in more than 100 million households around the world.

FRANKE FOOD PREPARATION CENTRE

Turn your sink into a wonderful work station with our convenient kitchen helpers which are designed to maximise the space you're working in. Whether it be chopping boards, strainer bowls, drainer baskets and more, each piece is designed to be in harmony with your cooking style and needs. Preparation, presentation and cleaning up is easy when you prepare with the right tools.

Roll kitchen chores away with our rollamat

Simple and versatile, the Franke rollamat is a wonderful accessory with a host of applications, from a dish drainer to a trivet.

Roll it out and you're ready. When you don't need it, just roll it up again.

Cutting edge chopping boards

We've thought hard about our kitchen tools so you can enjoy your wonderful kitchen even more. Our own range of chopping boards combine beauty with practicality in the ideal size for your Franke sink.

CHOOSING YOUR PERFECT SINK

As the kitchen sink is seen as the heart of the kitchen, it's the perfect starting point for creating your dream kitchen. Let your imagination run free with a range of fabulous options to help you maximise space and accentuate the look of the entire room.

There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

BOWL & DRAINER CONFIGURATION

The type and position of your bowl depends on how you intend to use your sink. If you like room to clean large items like grill pans, a larger single bowl may be best for you, or for a multi-functional purpose, you may prefer the versatility of two separate working bowls. For multi-bowl undermount sinks, it is important to decide which side you require the smaller bowl.

The drainer location is also an important consideration. For many sinks you will need to choose the specific version you prefer - with drainer on the left or right hand side. Whereas other sinks are reversible which indicates the drainer can be positioned on either side.

Single Bowl

1/2 Bowl
Double Bowl
This brochure demonstrates the huge breadth of styles available but in some ranges there are several configurations to choose from in the same style.

INSTALLATION TYPES

Sinks can be installed in 3 ways depending on your kitchen worktop and your preference:
T | TOPMOUNT SINKS

Topmount sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.
U | UNDERMOUNT SINKS

Undermount sinks are installed underneath the worksurface and therefore require a solid surface worktop such as granite, they are not compatible with laminate worksurfaces.
F | FLUSHMOUNT SINKS

Flushmount sinks feature a single thickness edge allowing a slimfit to the benchtop which can also be recessed resulting in a flush fit with the surface

MATERIAL TYPES

STAINLESS STEEL

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, flake or break.

It's the most popular material – and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

FRAGRANITE

Fragranite is an exceptionally tough material which is highly resistant to burns, dents chips and stains. It was pioneered by Franke and contains 80% quartz to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection.

FRAGRANITE COLOUR OPTIONS

ONYX   **POLAR WHITE**

SANITIZED® SURFACE

Bacteria

Moisture   Substrate with silver ions
The silver phosphate glass locates the bacteria via the moisture and deactivates it.

THE PERFECT MATCH

The Franke soap dispenser provides a fast and easy to operate hand pump for all liquid soaps. It fits neatly and unobtrusively alongside sinks in the worktop, can be filled from above and its design is carefully chosen to complement the Franke tap range.

Large and heavy taps should ideally be mounted directly through the solid benchtop or fully supported from underneath. For all other swivel taps, we recommend the use of the Franke Tap Support Arm (see page 73) to provide additional support. Please ensure all Franke tapware is installed at a pressure of no greater than 500 kPa in accordance with AS/NZS3500 and insist that your plumber flushes all of the water supply lines before installing tapware. Failure to do so may void warranty.

BRING YOUR SINK BACK TO LIFE

Franke Twisters are designed to clean and enhance the appearance of your sink by removing minor scratches and stubborn water marks.

Use the Franke Twister special sponge and clean the sink surface, then rinse thoroughly and polish with a moist rag or the softer Franke Inox Creme.
